AIR COMPRESSORS FOR MEDICAL PURPOSES

ADVANCED TECHNOLOGY IN THE FIELD OF COMPRESSED AIR

JSC «Remeza» was founded in 1989. The main aim of the company – production of modern reliable affordable compressor equipment, using high-quality components from leading manufacturers.

In this catalog JSC «Remeza» offers compressors, designed to provide high-quality compressed air laboratory and medical institutions. Lineup compressor equipment ensures compressed air as separate devices (apparatus), and to centralize all health facilities.

– Oil-free piston compressors for compressed air anesthesia equipment and ventilators (page 3).

– Oil-free piston compressors for the compressed air supply of dental, medical, lab equipment and tools (page 4-9).

– Oil-free compressors, piston and scroll centralized compressed air supply of various medical institutions (page 10-14).

– Compressor stations MBK based on screw or scroll compressors for centralized compressed air supply of hospital health care network lines with pressure of 5 and / or 8 Bar(g) (page 15).

Standard options:

- option «K» – in noise isolation house;
- option «M» – membrane air dryer (dew point -20°C);
- option «D» – version with refrigeration dryer;
- inner polymeric coating of air tank.

Additional options on request:

- production of compressors to another, other than those specified in the catalog pressure and supply voltage;
- galvanized air tank;
- selection and delivery of air treatment equipment in accordance with the specified parameters.

Compressor stations for medical purposes MBK for the centralized supply of hospital networks of health facilities by the compressed air with pressure 5 and (or) 8 Bar(g)

Compressor stations consists of two compressors, screw-type BK and air treatment systems, which includes pre-filters, fine cleaning and sterilizing filters. Compressor station has microprocessor control system.

On a base of oil lubricated screw air compressors serie BK with refrigerant air dryers

4,0+4,0 kW

5,5+5,5 kW

7,5+7,5 kW

11,0+11,0 kW

MODEL	MODEL compressor (2 шт, 2 pcs)	l/min	max bar	kW	V/Hz	kg	dBA
MBK 10-10-1(2)	BK5EM-10-500D	450+450	5/8	4,0+4,0	400/50	880	≤ 71
MBK 15-10-1(2)	BK7EM-10-500D	700+700	5/8	5,5+5,5	400/50	900	≤ 72
MBK 20-10-1(2)	BK10EM-10-500D	1000+1000	5/8	7,5+7,5	400/50	920	≤ 72
MBK 30-10-1(2)	BK15EM-10-500D	1400+1400	5/8	11,0+11,0	400/50	1150	≤ 75
