

## PISTON PRESSURE REDUCERS

### RPST 12

#### RPST 12 PRESSURE REDUCER

*This is the economic version of the 1/2" reducer; contrary of PU/4 it has a plastic piston movement instead of the diaphragme.*

*1/2" bottom connection 2 1/4" mini ball valves*

**41011391**

*1/2" bottom connection 2 EURO quick couplers*

**41011351**

*1/2" bottom connection 2 needle valves 1/4" OT*

**41011341**

*1/2" bottom connection without taps*

**41011311**

*1/2" bottom connection without taps and gauge*

**41011301**

### RPST 38

#### RPST 38 PRESSURE REDUCER

*This is the smaller version than 1/2" type, similar to the MIGNON it is different for the piston movement.*

*3/8" bottom connection 2 1/4" mini ball valves*

**41023551**

*3/8" bottom connection 2 EURO quick couplers*

**41023541**

*3/8" bottom connection 2 needle valves 1/4" OT*

**41023531**

*3/8" bottom connection without taps*

**41023511**

*3/8" bottom connection without taps and gauge*

**41023501**

### RPA 1

#### RPA 1 PRESSURE REDUCER

*It is the cheapest version of reducer for the small compressors; the knob rotation pushes directly the coil operating on the plastic piston. Lateral 1/4" thread.*

*1 1/4" mini ball valve*

**41035551**

*1 EURO quick coupler*

**41035541**

*1 needle valve 1/4" OT*

**41035531**

*Without tap*

**41035511**

*Without tap and gauge*

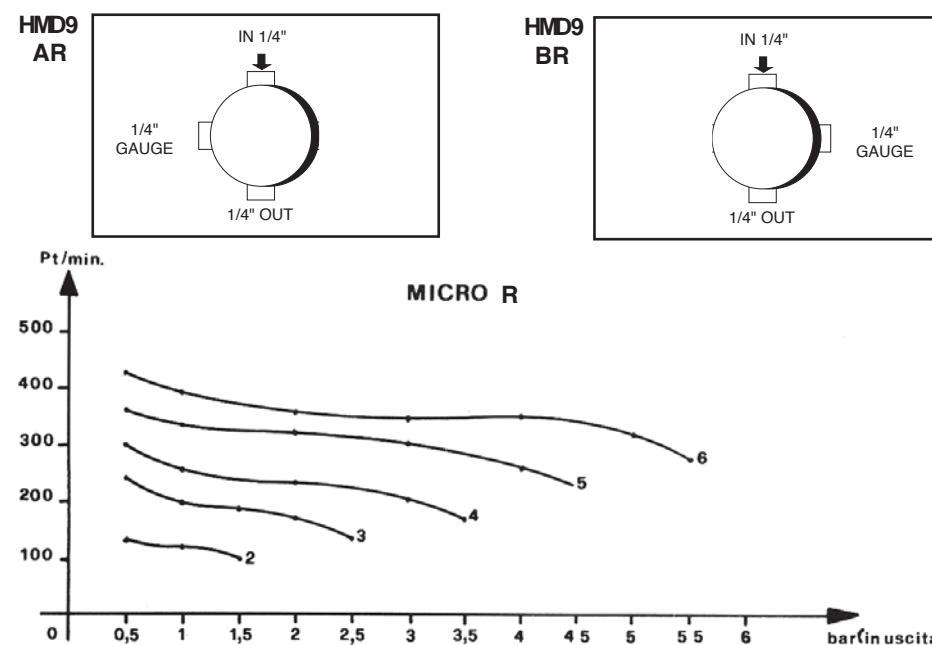

**41035501**

**MICRO R**

### MICRO R PRESSURE REDUCER

This is the smallest unit in the series. It is made in metal (casting) and plastics (cup and adjustment knob) that can be locked at the desired operating pressure and has no filter. This type "R" has a plastic piston sliding inside the body. The standard version is fitted with a mini ball valve 1/4" or quick coupler. The pressure gauge dia. 40 mm has a 1/4" connection and a 0-12 BAR scale and PSI scale. Two models A - B are available, as for diagram at picture in the previous page.

Model AR - 1 1/4" mini ball valve

41034192

Model AR - 1 EURO quick coupler

41034092

Model AR - without taps out 1/4"

41034022

Model AR - without taps 1/4" and gauge 1/8"

41034012

Model BR - 1 1/4" mini ball valve

41034792

Model BR - 1 EURO quick coupler

41034772

Model BR - without tap out 1/4"

41034722

Model BR - without taps 1/4" and gauge 1/8"

41034712

### MICROMATIC R

1 1/4" mini ball valve

41035102

1 EURO quick coupler

41035022

without taps out 1/4"

41035002

### MICROMATIC R PRESSURE REDUCER

Similar to the MICRO has a adjustment brought about by a quadruple screw that makes to read the pressure of reducer with one round on 360° on a branded scale under the cup without using the gauge.
